折り筋とぶつかるところまで 折り筋をつける Fold and unfold, up to the crease lines.

折り筋に合わせて折り筋を つける Fold edges to the crease lines and unfold.

中心線に合わせるように折る Pleat so that the edge runs along the center line.

intersections.

右側も同様に折り筋をつける Unfold. Crease on the right in the same way.

折り筋をつけて戻す。

ついている折り筋で折る Fold up along the crease line.

ついている折り筋に したがって折りたたむ Swivel using the crease lines.

カドを折り返す Open the layers.

用紙のカドと辺の中点に各パーツを置いた、単純な「ざぶとん折り」の構成から、立体的なウサギの立ち姿が 目然に折り出されます。この作品では、構造の持つ明快 さがそのまま折り工程として表れてきたように思いま す。中盤・終盤に立体化したまま折り進めなくてはなら ない工程が入ってくるため、けっして簡単な部類ではな いかもしれませんが、一度折り上げてみれば、折り工程 の筋道が理解しやすい作品ではないかと思います。

初出時からは、細部の改良があちこちに施されています。シンプルな構造を最大限に活かすために仕上げにおける作為的な加工は最小限にとどめたい、それでいて、ウサギの柔らかなイメージを表現したい。このバランスを吟味するのに、結果的にずいぶんと時間がかかりました。

This model can be folded out without hardship from the simple blintz fold structure (= the four corners folded onto the center point of the square sheet), with each corner and middle point of the edges being the parts of the rabbit. This clarity of the structure is reflected in the simple and comprehensible folding procedures. The folding may not be so simple in the middle and final parts, as you have to fold the model with it being three- dimensional, but you can easily understand the process once you complete it.

Details are revised since the first version. I took time to establish making the model well-balanced with the least shaping of the model in the end not to spoil the structure of it while keeping the roundness of the rabbit.
